Capabilities Overview

How may we help you?

Precision metal fabrication and machining solutions for demanding industrial applications.

Metfab Engineering can meet all of your metal fabrication needs - from light fabrication of steel, stainless steel and aluminum to heavy weldments and machine bases. Over three decades of experience in all phases of metal work have positioned us as one of the industry's most reliable performers. Give our experienced craftsmen a challenge and they will deliver the finished product to you - on spec, on time and on budget. That's how we establish the kind of long-term relationships that can be mutually beneficial.

All members of our team - those in sales, layout/engineering, manufacturing and machining - have extensive hands-on fabricating experience. This enables us to provide knowledgeable assistance and recommendations throughout the entire fabrication and machining process - an edge that sets us apart from the rest.

The manufacturing process begins with your product design and/or ideas. Metfab's highly trained staff will work with you every step of the way to ensure the success of each and every project. Our full range of capabilities allows us to take your concepts and turn them into finished products - ready for shipment to your customer.

Our state-of-the-art equipment and facility, with our knowledgeable staff, make Metfab Engineering your full-service fabricating facility. We welcome you to tour our facility - a visit that will indicate our expertise and enable you to see our philosophy at work.
